

Dear Clients, Investors, and Colleagues,

Since 2011, when SGRE was founded in a small office sublet, it has grown each and every year. What we're more proud of than the growth, though, is that we have improved each and every year as well. We've always believed in focusing first on excellence and letting scale follow naturally.

As a result, each of our core businesses (multifamily mgmt, commercial mgmt, commercial brokerage, and opportunistic acquisitions/investment) has indeed scaled, and their identities stand alone in their respective markets.

Now, we are launching new platforms for each pillar in our family of businesses. Here are each of our new company websites, which spotlight what makes each division of SGRE exceptional.

Our flagship site features an overview of our professional services offered, access to our client login portal, and information about the benefits of partnering or investing with SGRE.

sgreinc.com

Our "SG at Home" website is dedicated entirely to our current residential tenants. We feel that a website just for our existing tenants – with no marketing, listings, or corporate elements – conveys our core value of enhancing the experience of our buildings/communities. It's full of resources, links, and features aimed solely at our customers' satisfaction and QOL.

sgathome.com

Our commercial brokerage department is a very long standing and successful component of our business and now features its own destination website. Our retail and office listings are spotlighted in our site with greater detail and tout more robust data and analytics capabilities.

sgrecommercial.com

A website exclusively focused on our available residential listings. This site is dedicated entirely to people's housing searches and features improved search functions, easier UI, and additional features such as neighborhood-by-neighborhood and community resources.
